The screenshot displays the 'Select Geographies' interface of the American FactFinder. The interface includes a top navigation bar with tabs for 'Name', 'Address', and 'Map'. Below this, there are three main sections: a 'Select Geographies' panel on the left, a 'Legend' panel below it, and a map area on the right. The 'Select Geographies' panel contains a dropdown menu for 'Select' (currently set to 'State'), a text input field, and a button labeled 'from the map using one of the following selection tools:'. Below this are four selection tool icons: a point, a rectangle, a polygon, and a circle. The 'Legend' panel shows 'Boundaries' (State and '08 County) and 'Features' (Street and Stream/Waterbody). It also includes a 'Your Selections' section with a yellow square icon and a note: 'Items in grey text are not visible at this zoom level'. At the bottom of the 'Select Geographies' panel is a button labeled 'Boundaries and Features'. The map area on the right shows a map of the United States with a red callout box highlighting the map navigation tools. This callout box is connected by a red line to a larger, more detailed callout box that shows a zoomed-in view of the map navigation tools, including a search icon, a plus sign, a minus sign, a hand icon, a green map of the US, an information icon, a printer icon, and a document icon. The map itself shows a zoomed-in view of a region with various roads and geographical features.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value.
